Office Action Summary	Application No. 10/791,105	Applicant(s) MAEDA, OSAMU	
	Examiner GEORGE C. MONIKANG	Art Unit 2614	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 3-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

3. The limitation in claim 3 filed 3/24/2009 that reads " an output generator arranged to concurrently output first and second sound signals to a common speaker based on the engine sound data stored in the memory," is not clearly defined in the specifications (figs. 1 & 11: 7) in a manner in which enables the understanding of one of ordinary skill. The output signal of synthesized sound output generator 7 of figs. 1 & 11 is a single signal output which drives the speaker. However, applicant claims an output generator able to concurrently output a first and second signal. Therefore, according to figs. 1 & 11: 7, there is a single signal output as suppose to the fist and second signal outputs claimed.

4. Appropriate correction is required.

5.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2614

7. Claims 3-4 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. The invention is different from what is defined in the claim(s) because the limitation in claim 3 filed 3/24/2009 that reads " an output generator arranged to concurrently output first and second sound signals to a common speaker based on the engine sound data stored in the memory," is not clearly defined in the specifications (figs. 1 & 11: 7) in a manner which correlates with the specification. The output signal of synthesized sound output generator 7 of figs. 1 & 11 is a single signal output which drives the speaker. However, applicant claims an output generator able to concurrently output a first and second signal. Therefore, according to figs. 1 & 11: 7, there is a single signal output as suppose to the fist and second signal outputs claimed.

8. Appropriate correction is required.
